Selling Days

The actual number of days a firm was open for business or that the sales people made customer calls [calendar days less weekends (if applicable) and holidays]. By supplying selling days of each firm, the sales per selling day are standardized according to actual business conditions or company policies.

Days Outstanding

The number of days outstanding on this report are calculated by adding the current month's sales and the previous month's sales and dividing the total by the number of calendar days of the two months. The result is a figure representing average sales per calendar day.

The total figure provided for closing accounts and notes receivable is divided by the average sales per calendar day. The result is the number of days outstanding at the end of the month being prepared.
